Océane LAM

Master's student in Creative Technology at ESILV (Ecole Supérieure d'Ingénieur Léonard de Vinci) elective Human Body and Brain

Education

Engineering Degree, Master's Degree in Creative Technology
From 2022 to 2027 ESILV Paris

One-semester university exchange in Spain
From Feb. 2025 to Jun. 2025 UVIC (Universitat Central de Catalunya) Barcelona

PCSI preparatory class (Physics, Chemistry, and Engineering Sciences)
From 2021 to 2022 ENCPB, Pierre-Gilles-de-Gennes High School Paris 13

Work experience

UX/UI & Marketing Digital
From Apr. 2026 to Aug. 2026 Officience Paris, Ho Chi Minh
Active participation in the product development cycle at the intersection of design and business. Responsible for User Research and UX/UI design on Figma (from user research to interface prototyping), combined with driving digital marketing initiatives aimed at maximizing acquisition and optimizing conversion funnels.

Academic Tutor
Since Jun. 2025 Acadomia & Parkours Paris, France
Private tutoring, homework help, and academic support for students from primary to high school. Taught all subjects at Parkours, with a specialization in Mathematics and Physics-Chemistry at Acadomia. Provided practical preparation for the Brevet and Baccalauréat exams, centered on active listening and effective organization.

Internship: Website and social media
From July 2024 to Sept. 2024 visual arts company, Atelier PHUONG Paris
3-month internship. Deployment and management of the company's online presence, including content production, social media management, and web visibility optimization. Use of WordPress for the website.

Seasonal employment
July 2023 restaurant, DUPO Paris
Customer service and teamwork: welcoming and following up with customers, resolving issues, collaborating with the team to ensure satisfaction and efficiency.

9th grade internship
Dec. 2017 Groupama Assurances Noisy-le-Grand
Discovering insurance professions and performing administrative tasks: file management, customer follow-up, and learning internal procedures.

Projects

Kickstarter: designing an object from ideation to prototyping (2026)
Collaborative work on the design and prototyping of an object, from the ideation phase to its promotion on Kickstarter, using Canva for the communication campaign.

DreamLogue, AI Dream Journal (2026)
Development of an interactive group journal with AI features, including functional prototyping, interface design, and UX improvement. Prototypes developed using Figma.

Creation of a video game world (2025)
Design and development of a virtual environment within the Unity engine.

Grand Challenge of Engineering Schools (2024)
UX/UI design of a health app for student well-being, with prototyping in Figma. Collaborative project: contribution to design, team coordination, and monitoring of key stages.

PIX2 (Imagination & Exploration Project 2): Quadrupedal robot (2023)
Collaborative design of a quadrupedal robot, incorporating mechanical modeling in SolidWorks, wiring and integration of sensors/motors, and embedded programming on Arduino.

PIX1 (Imagination & Exploration Project 1): Ornithopter (2022)
Team-based design and construction of an ornithopter applying principles of mechanics, modeling, and prototyping. Computer-aided design performed using SolidWorks.
